Subject: RE: We have our own HNI

Oh, I wasn't aware of that. So we can't just import new sims with our PLMN into the cloud EPC?

We have done that in the past for some former Telrad operators. Support will need to do that for you. We will need your K and OPC values.

Are we going to have to change out all our sims with 31198 when you move to 314030 or to use ours?

No, but roaming will need to be turned on, on the UEs. Especially CAT6 UEs, for which the firmware did NOT set roaming on as default. Unless roaming was turned off on the CAT4 UEs, they are already set to roam.

Do we need to add a secondary PLMN to the eNb's to support both 31198 and 314030 to be able to make the transition?

No, but you will need to upgrade firmware on your eNBs to change to the new EPC Cloudcore environment. We began beta testing this new environment in October and GA'd firmware last month to work on the new environment.

If all this info is in your announcement I can wait for that.

Respectively,

Rick Harnish

Jon,

You will need your own Local EPC to use your new HNI. I have added Katie, who can quote you on that. We are transitioning to the new Cloudcore PLMN 314-030 in the next month. I am actually working on an announcement about that now and expect it to be announced in the next few days.

Rick, we got our own HNI(IMS) number. How do we go about implementing this. Do we need to add it to the PLMN list on the eNb's. It is 313-800
